Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-22	YES
	Claims		NO
Inventive step (IS)	Claims	1-22	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-22	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

This report has been based on the amended claims filed with the letter of 2005-02-17.

Documents cited in the International Search Report:

D1: WO0160069 A
 D2: EP1032148 A
 D3: EP0967804 A
 D4: US5424770 A
 D5: EP0751640 A

The cited documents represent the general state of the art.
 The invention defined in claims 1-22 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed system for transmitting signals to a plurality of subscriber receivers, wherein each signal represents a type of information belonging to a particular contents category, comprising: a central management server adapted to receive administrative instructions pertaining to the transmission of the signals to the subscriber receivers, and in response to the administrative instructions organize signals from a number of signal sources before transmission thereof to the subscriber receivers, at least one client computer each having an interface towards the central management server and being adapted to produce administrative instructions for organizing a sub-set of the signals to be transmitted via the central management server, and a transmission unit adapted to receive the signals and, in accordance with an organization scheme produced by the central management server transmit these signals to the subscriber receivers, the organization scheme

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.
Continuation of: Box V

specifies, for each signal to be transmitted, a transmission resource, a time instance and a contents category, wherein the contents category for at least one segment of the signal determines which sub-segment that will be presented in which subscriber receiver.

Accordingly, the invention defined in claims 1-22 is novel and is considered to involve an inventive step.

The invention is industrially applicable.
